Give me a call when you get a chance to discuss proclamations.

SarahLewis mentioned you are the final sign off on proclamations. Is that right? FYI that there was a lot of discussion about a Clean Energy Week proclamation last week, which we were included in.

Thank you, Jeremy.

No concerns if you and DEQ agree on the language of the proclamation and as long as we're comfortable explaining why the proclamation characterizes clean energy as it does.

Following up to let this group know I have drafted the proclamation and am running by DEQ's energy office to get their input before moving forward within the Governor's Office for comments.

One policy issue I do want to raise now, however, is that the National Clean Energy Week template and movement defines "clean energy" very broadly to include natural gas, carbon capture and sequestration, and nuclear energy. I've drafted the NC proclamation to define "clean energy" to include renewables, biomass, and energy efficiency, which are uncontroversially clean energy.

Including other energy sources in the definition of clean energy would raise big concerns among the clean energy sector and environmental community. Supporters of natural gas and nuclear would argue those sources are clean, but I don't think they will be up in arms about it not being considered clean energy in the proclamation.

While Matthew Sear below is talking about a National Clean Energy Week, in the proclamation, Gov will be proclaiming Clean Energy Week in NC and, accordingly, define clean energy on his own terms.

Do you all have any concerns about this approach to the definition of clean energy? Is anyone aware of Gov considering "clean energy" in the broad terms that the NCEW folks do?

Subject: RE: National Clean Energy Week Proclamation

Pretty much every week is declared for something but that is not a reason not to do this.

The proclamation would declare it Clean Energy Week for North Carolina.

Looping in Sheryl who can actually make the proclamation happen.

Thanks,
Noelle

Subject: RE: National Clean Energy Week Proclamation

Declaring a Clean Energy Week sounds like a good idea to me. The national campaign looks legit to me based upon the steering committee members (e.g., Advanced Energy Economy, SEIA, Nuclear Energy Institute, and others). I asked Chris Carmody whether he has heard of this movement, and he replied NCCEBA is supportive.

A couple of outstanding questions in my mind:

- Is Sept 25-29 already declared for another purpose on NC? If so, does that matter?
- The draft proclamation would have the Governor declare the week as National Clean Energy Week. Is that right, or would he declare it Clean Energy Week in North Carolina?

Do any of you see potential downsides?

Subject: NCEW Proclamation

Hey there Jim,

We've recently started working with a new client in the clean energy space who is helping to put on the first annual National Clean Energy Week to be hosted this year in DC. I'm not sure whether or not anyone from Flywheel has already reached out on this, but in the event that we hadn't, I wanted to touch base with you.

We'd like to discuss a draft state proclamation (attached) for Governor Cooper to make declaring September 25th - September 29th as National Clean Energy Week. This is a bipartisan effort to recognize and support commonsense solutions that address America's economic and energy needs.

North Carolina is a leader in clean energy, providing about one-third of the state's net generation in 2016. Natural gas also supplied about 30% of the state's net generation in 2016, surpassing coal for the first time in history. Hydroelectric power, biomass, and solar photovoltaics (PV) provide approximately 10% of net electricity generation in the state.

More info on NCEW can be found at their website, <https://nationalcleanenergyweek.org>.

If you'd like to learn more about NCEW, we can introduce you via phone or in person to our client, CRES' Managing Director, Heather Reams.

Thanks, and hope you're doing well.
